

Welcome to the wiki area of GuedeL.

I will try to base this area on the “franglais” -AKA “globish” (for Global English) language to make it accessible for the non-French speaking readers.

Nevertheless, the already existing how-to in French will not be translated (at least in the first time ...).

Don't expect to find exceptional information in this wiki: it is just more or less just a collection of private notes I make during installations, configurations or during the simple use of my computing material.
