

Installation of BackupPC from sources on Ubuntu20

Difficulté

Moyen

BackupPC

Main tuto: <https://kifarunix.com/install-and-setup-backuppc-server-on-ubuntu-20-04/>

- to get user “backuppc” with uid=995, gid=1000 and /home/backuppc as home folder:

```
# groupadd -g 1000 backuppc
# useradd -r -m -d /home/backuppc -s /bin/bash -c "BackupPC user" -u
995 -g 1000 backuppc
```

- let login on the remote client with “root” (user backuppc doesn't exist on the backedup clients!)

```
$Conf{RsyncSshArgs} = [
    '-e', '$sshPath -l root',
];
```

HTTPS

Création de certificat auto-signé:

<https://www.digitalocean.com/community/tutorials/how-to-create-a-self-signed-ssl-certificate-for-apache-in-ubuntu-16-04>

Connection

https://URL/BackupPC_Admin

Issue with ping

```
# chmod 4755 /bin/ping
```
